Profile

Java Backend Developer with nearly 7 years of experience designing and developing scalable enterprise applications using Java, Spring Boot, REST APIs, and Microservices. Experienced in building backend automation, API integrations, CI/CD pipelines, and automated testing for enterprise and banking environments. Strong experience with API governance, observability, and enterprise technologies including Apigee, Spectral, Splunk, and Pivotal Cloud Foundry. Currently working on NatWest Group projects, delivering secure and automated API onboarding solutions.

Professional Experience

Sandhata Technologies *Chennai, India | 06/2023 – Present*

Technology Expert

Project 1: API Onboarding Automation – NatWest Group

- Developed backend automation solutions using Java and Spring Boot to streamline API onboarding workflows for producers and consumers.
- Built and maintained Spring Boot microservices to orchestrate onboarding workflows and integrate with enterprise API platforms.
- Automated Jira workflow activities to reduce manual intervention and improve onboarding visibility.
- Integrated IBM Watson chatbot capabilities to support onboarding queries and provide real-time assistance.
- Designed automated testing pipelines to validate API contracts and integration points.
- Implemented application logging and monitoring using Splunk and supported deployments on Pivotal Cloud Foundry (PCF).
- Collaborated with architects and cross-functional teams to design and deliver business-aligned API onboarding solutions.

Project 2: Conformance Tools – NatWest Group

- Developed Spring Boot microservices to automate OpenAPI specification validation and enforce enterprise API standards.
- Created and maintained custom Spectral rules using JavaScript to validate API specifications against defined governance standards.
- Integrated API specification validation into CI/CD pipelines, enabling automated governance checks during deployment.
- Collaborated with architects to design and implement a scalable API validation framework for consistent contract compliance across services.

Project 3: Apigee Hybrid Onboarding Automation – NatWest Group (Present)

- Developing and maintaining Java and Spring Boot microservices to automate end-to-end API customer onboarding workflows.
- Deploying and supporting microservices hosted on Pivotal Cloud Foundry (PCF).
- Building and maintaining GitLab CI/CD pipelines to streamline application deployment and reduce manual onboarding activities.
- Leveraging Backstage as a developer portal component to standardize service cataloging and improve service discoverability.
- Collaborating with cross-functional teams to expand automation coverage and improve the hybrid API onboarding experience.

Cognizant Technology Solutions *Chennai & Coimbatore, India*

Associate / Software Engineer *10/2019 – 06/2023*

Project: Credit IT – Ford

- Developed and maintained Java and Spring Boot microservices for credit-related business modules.

- Designed and implemented RESTful APIs and backend business logic for enterprise applications.
- Worked with DB2 and MySQL databases for data persistence and application development.
- Developed unit tests to improve application reliability and code quality.
- Integrated security and code-quality tools including Checkmarx, FOSSA, and SonarQube into the development lifecycle.

Project: Lighthouse – AIG

- Developed test automation flows using Selenium and Spring Boot.
- Integrated with application APIs and supported defect tracking and resolution using JIRA.
- Implemented application log monitoring using Splunk to improve error visibility and troubleshooting.

Skills

Programming & Backend
Java 8+, Spring Boot, Spring Framework, REST APIs, Microservices, JPA, Hibernate

Core Java
OOP, Collections, Streams, Lambda Expressions, Exception Handling, Multithreading

Databases
MySQL, Oracle, DB2, MongoDB

Testing & Code Quality
JUnit, Selenium, SonarQube, Checkmarx, FOSSA

API Management & Governance
Apigee, Spectral, 42Crunch, OpenAPI, REST API best practices

DevOps & CI/CD
Git, GitLab, GitHub, Jenkins, TeamCity, Maven, JIRA, Rally

Cloud & Platforms
Pivotal Cloud Foundry (PCF), Backstage

Monitoring & Observability
Splunk

Automation & AI
IBM Watson, Jira Automation, Power Automate

Education

B.E. in Electronics and Communication Engineering *Karur, India | 2015 – 2019*
M. Kumarasamy College of Engineering
CGPA: 7.27/10

Awards

MVP of the Quarter – Q3 2024
NatWest Group

MVP of the Month – March 2024
NatWest Group

Client Centric Award – Q3 2023 & Q2 2024
